

## Ambulatory Detoxification

- Superior Medical Care
- Relaxing At-Home Environment
- Substance Abuse/Opioid Detox

Our Ambulatory Detoxification Program is an outpatient model for individuals requiring detoxification from substance-abuse/Opioids, with many of the benefits of inpatient detoxification but in a less-restrictive, highly effective and comfort providing environment. This is the first step in a continuum of substance-abuse treatment that ultimately leads to recovery. Our full continuum of care now will include **Detox, Residential Level 2, PHP, IOP, and OP.**

## Common Questions About the Dynamic Life Recovery Centers Ambulatory Detox Program

**Q:** What is the program?

**A:** Our **Dynamic Life Recovery Ambulatory Detoxification Program** is an outpatient model for individuals requiring detoxification from substance abuse especially Opioid use. The program is unique in that it provides many of the benefits of inpatient medical detoxification but in a setting that is less restrictive/more comfortable and can be a less costly opportunity.

**Q:** Who provides treatment?

**A:** Patients will be under the care of an interdisciplinary team that includes Physicians, Registered Nurses, Nurse Practitioners, Behavioral Health Technicians, in addition to a Medical Director, Nursing Director, and therapists that treat both substance abuse and co-occurring mental health issues.

**Q:** What services does it entail?

**A:** Services include assessment and patient observation, medical history, monitoring of vital signs, treatment of withdrawal symptoms, and referrals for ongoing addiction and substance abuse treatment. Ambulatory detoxification services fit our mission and vision of providing patient-centered, outcome-based care in the least restrictive environment that provides for maximum comfort. It is the beginning step to entering into the the continuum of care best provided by **Dynamic Life Recovery**.
